# JioCinema expands OTT footprint with Warner Bros deal

Viacom18 set to disrupt space with latest arrangement

ALOKANANDA CHAKRABORTY  
New Delhi, April 27

**WARNER BROS DISCOVERY** and Viacom18 on Thursday announced that JioCinema would be the new streaming home of HBO, Max Original and Warner Bros content from May 1. The partnership includes exclusive content rights across digital and linear. Under the arrangement, HBO Original, Max Original and Warner Bros Television series will premiere on JioCinema on the same day as in the US.

JioCinema is already the streaming partner of IPL. Viacom18 has deep pockets and is trying to disrupt the entire ecosystem, say analysts. "This partnership goes to show that JioCinema has emerged as a serious player in the OTT business in India," says Karan Taurani, senior VP, Elara Capital. "They already have the IPL, which is the most expensive sporting property in the country at the moment, and JioCinema has 10-12% of the OTT market in India. This partnership will give a big fillip to their plans to scale up and they can potentially become the largest video player after YouTube, an aggregator backed by Google."

India's OTT market size stands at \$2 billion (including AVOD or advertisement-based video on demand + SVOD or subscription-based video on demand). Netflix is the pureplay SVOD market leader with a 35% market share. Till IPL moved address, Hotstar was the AVOD

## HOTSTAR'S LOSS, JIOCINEMA'S GAIN

■ Earlier this month, Disney+Hotstar announced on its Twitter handle that after March 31, no HBO content will be available on it

■ JioCinema is already the streaming partner of IPL. Analysts say Viacom18 is trying to disrupt the entire ecosystem

market leader, primarily because of T20 tournament, which could have been 50-60% of its revenue in India as per estimates. "With IPL going away, Hotstar's revenues this year could be down by as much as 50% and subscription base could be down 25-30%," adds Taurani.

There will be a time when JioCinema will start charging customers as well, predict analysts, because pureplay AVOD is not sustainable. They have to make it paid because the content cost is phenomenally high, say observers.

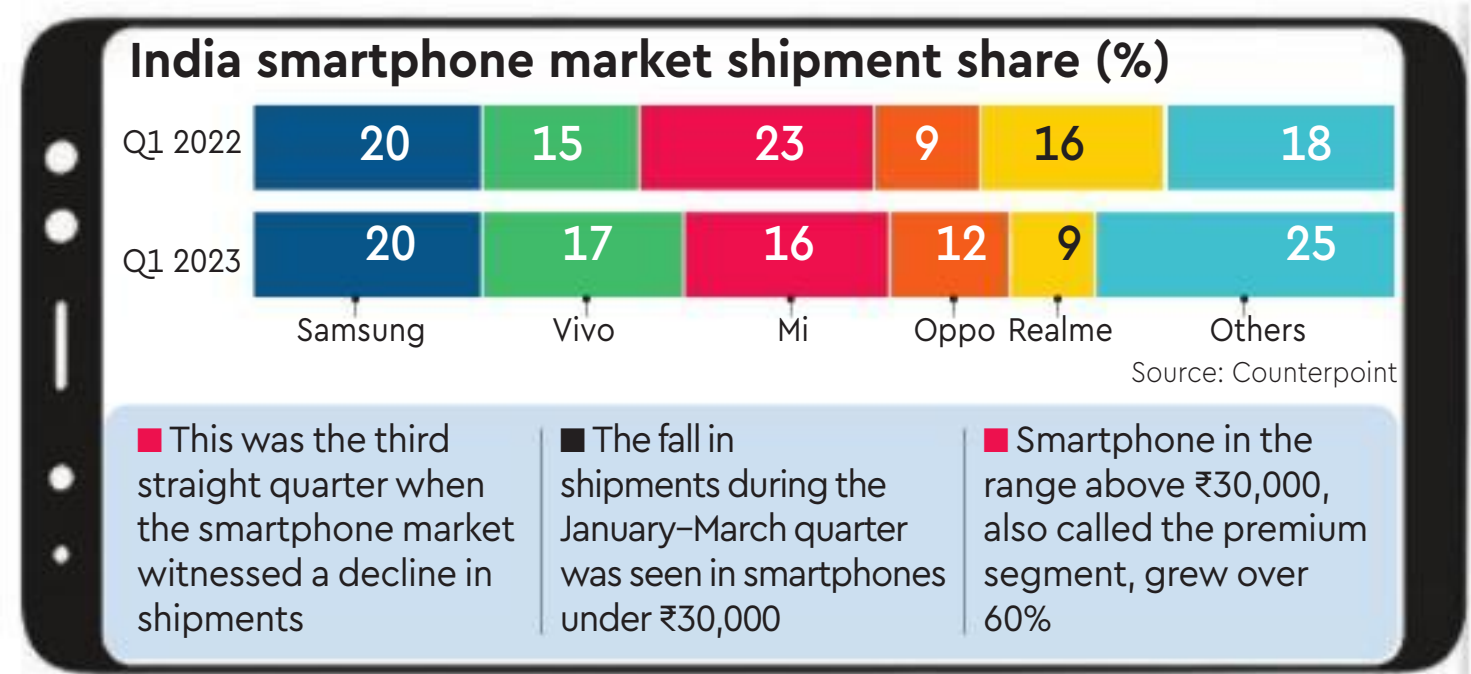

For the record, most of the content produced by Warner-Media was available in India on Disney+Hotstar. Earlier this month, Disney+Hotstar announced on its Twitter handle that after March 31, no HBO content will be available on it.

The JioCinema-Warner deal includes current and future seasons of HBO's globally acclaimed series such as *House of the Dragon*, *The Last of Us*, *Succession* and *The White Lotus* and return-

ing seasons of *True Detective: Night Country*, *Euphoria*, *Winning Time: The Rise of the Lakers Dynasty* and *Perry Mason*. Also featured as part of the agreement are HBO Original series including *The Idol*, *White House Plumbers*, *The Sympathizer* and *The Regime*. HBO's popular series and documentaries, including *Game of Thrones*, *Sex & The City*, *Big Little Lies*, *Chernobyl* and *Veep* will be available in the country as well.

Max Original series like *And Just Like That...*, *Peacemaker* and *The Flight Attendant*, highly anticipated premieres such as *Dune: The Sisterhood*, *The Batman* spinoff, *The Penguin* and *Duster* will now be streamed on JioCinema. Television series like *East New York* and *Gotham Knights* are also part of the offering. Future Warner Bros movies plus its vast film library, including *Harry Potter*, *Lord of the Rings* and DC Universe movies as well kids' animation titles like *Dexter's Laboratory* and *Tom and Jerry Kids* will also be available on JioCinema.

# Mobile shipments see steepest fall in Jan-March

JATIN GROVER  
New Delhi, April 27

**THE YEAR 2023** has started on an adverse note for the Indian smartphone market as shipments fell 19-20% to 31 million in January-March, the highest-ever decline in the first quarter, according to data from Counterpoint and Canals. The fall in shipments is due to sluggish demand, high inventory build-up, growing demand for refurbished phones etc, analysts said.

This was also the third straight quarter when the market witnessed a decline in shipments.

"We are observing a change in consumer behaviour – demand is now concentrated around promotional periods. The beginning of the quarter saw a surge in demand across channels around the Republic Day sales period. However, demand dropped significantly after the sales period," said Shilpi Jain, senior research analyst at Counterpoint.

According to Jain, the situation will remain similar in the April-June quarter as well with growth coming back in the second half of the year owing to faster 5G upgrades, easing macroeconomic pressure, and festive season.

The fall in shipments during the quarter was seen in smartphones under ₹30,000. Smartphone shipments in the range above ₹30,000, also called the premium segment, grew over 60%.

"Premiumization trend is becoming stronger with each

passing quarter. The premium segment's share almost doubled in Q1 2023 compared to Q1 2022. Affordability is the key here as we saw more financial schemes being launched, like Apple's 'No-cost EMI with zero down payment' through HDB Financial Services, offers on latest premium segment launches, increase in trade-in offers and push from retailers," said Prachir Singh, senior research analyst at Counterpoint.

With regard to the brands, Samsung led the Indian smartphone market for the second consecutive quarter with a 20% market share, followed by Vivo at 17%, Xiaomi at 16%, and Oppo at 12%, according to Counterpoint.

"Samsung has been efficient with its fast-moving model placement in the offline space. For this quarter, it was the new 5G-capable A-series. Apple's new offline stores staffed by expert employees will further enhance its brand experience and position. While online heavy brands have driven units primarily through e-commerce sales, leading to periodic volume surges," said Sanyam Chaurasiya, analyst at Canals.

Apple continued to lead the premium and ultra-premium segments, with strong growth in offline channels. According to Counterpoint, the company's shipments grew 50% y-o-y and it grabbed a 6% share in the January-March quarter.

"At present, India's smartphone export growth is primarily driven by Apple and Sam-

sung, helping achieve a record-breaking export value of almost \$4 billion in Q1.

**Madras HC orders Google not to remove Matrimony app:** In a temporary relief to Matrimony.com, the Madras high court has granted interim injunction restraining Google from delisting the app of the Chennai-based online match-making company from Play Store till June 1, 2023 for non-compliance of the payment policy imposed by the American technology giant.

Matrimony.com had filed a suit in the high court seeking to restrain Google from removing app owned by the company from the Play Store for former's refusal to accept the tech giant's payments policy.

The suit stated that the present payment policy of Google is in violation of applicable law and imposing 11-26% fee on the revenue will cause huge hardship and irreparable loss to all the app developers.

## EXPLAINER

# INDIA'S FIRST WATER BODIES CENSUS

The Jal Shakti ministry has released the report of India's first water bodies census, which provides a comprehensive database of ponds, tanks, lakes, and reservoirs in the country. The census, conducted in 2018-19, covers more than 2.42 million water bodies across states and Union territories. **Sandip Das** outlines its key findings

## Status of India's water resources

INDIA ACCOUNTS for 18% of the world's population, but has only 4% of its fresh water resources. More than 80% of water in the country is consumed in agriculture while the rest is used for domestic and industrial purposes.

The country's water resources have become extremely polluted, with 70% of surface water found to be "unfit" for human consumption. A sound and reliable database on water bodies is prerequisite for effective planning and policy making for prevention of pollution and furthering of conservation and restoration of water bodies.

Per capita availability of water in the country is projected to fall from 1,486 cubic metres in 2021 to 1,367 cubic metres by 2031, the government said, citing data from a report compiled by the Central Water Commission (CWC). Per the 1951 census, the per capita availability was more than 5,000 cubic metres.

## Why was the census needed

THE JAL SHAKTI ministry undertook the census so that the findings can help in policies on judicious water use and conservation. The census was conducted in convergence with the sixth minor irrigation census. All natural or man-made water units bounded on all sides with some or no masonry work, used for storing water for irrigation or other purposes—such as industrial, pisciculture, drinking, ground-water recharge, etc—qualify.

Water bodies are structures where water from ice-melts, streams, springs, rain or drainage from residential or other areas is accumulated. Storage of water diverted from a stream, *nala* or river is also included. The definition excludes oceans, rivers, waterfalls, swimming pools, covered water tanks made by individuals, factories and temporary water bodies.

**2.42 mn**  
WATER BODIES IN THE COUNTRY; 2.345 MN IN RURAL AREAS

**1.44 mn**  
HAVE BEEN CLASSIFIED AS PONDS BY THE CENSUS

**2.03 mn**  
ARE IN USE, WHILE THE REMAINING ARE NON-FUNCTIONAL

**Only 1.6%**  
OF THOSE ENUMERATED HAVE BEEN ENCRACHED

## Key findings

THE CENSUS HAS enumerated 2.42 million water bodies, out of which 97.1% (2.35 million) are in rural areas and 2.9% (69,485) in urban areas. The census classifies 59.5% (1.44 million) of the water bodies as 'ponds'—tanks (15.7%), reservoirs (12.1%), water conservation schemes, percolation tanks & check dams (9.3%), lakes (0.9%) and others (2.5%).

Among these water bodies, 83.7% (2.03 million) are 'in use'; the remaining are non-functional on account of drying up, silting, construction, etc. According to the census, 55.2% (1.33 million) are owned by private entities and 44.8% are under public ownership. Information on encroachment of water bodies has been collected, according to which only 1.6% water bodies out of all the enumerated bodies have suffered encroachment. Within this pool of encroached bodies, 95.4% are in rural areas and remaining 4.6% in urban areas.

## Regional variations

MAHARASHTRA LEADS amongst all the states and UTs in building water bodies under water conservation schemes. The census found West Bengal has highest number of ponds and reservoirs, while Andhra Pradesh has highest number of tanks and Tamil Nadu has highest number of lakes. Out of 97,062 water

bodies in Maharashtra, 96,343 are in located in rural areas and only 719 in urban areas. Almost 93% of water bodies in Maharashtra are in the form of check dams, indicating that the rural part of the state relies on water-conservation schemes—more than any other state in the country, as per the census.

West Bengal's South 24 Parganas has been reported to be the district with the highest (0.35 million) number of water bodies across the country. It is followed by Andhra Pradesh's Anantapur (50,537) and West Bengal's Howrah (37,301). In terms of privately-owned water bodies, most of them are either

owned by individuals or farmers, followed by a group of individuals and other private bodies.

West Bengal topped the list with the largest number of water bodies owned by private individuals followed by Assam, Andhra Pradesh, Odisha and Jharkhand.

## फेक एसएमएस, कॉलपासून सुटका

दिल्ली.भारतीय दूरसंचार नियामक प्राधिकरण (ट्राय) 1 मे पासून काही नियमांमध्ये बदल करणार आहे. नवीन नियमानुसार, ट्राय एक नवीन फिल्टर आणणार आहे. या फिल्टरमुळे 1 मे नंतर फोनमध्ये बनावट कॉलिंग आणि एसएमएस येऊ शकणार नाहीत. असे झाल्यास ग्राहकांना नको असलेल्या कॉल्स आणि मैसेजापासून सुटका मिळेल. याबाबत ट्रायने दूरसंचार कंपन्यांना सूचना दिल्या आहेत. ट्रायने फिल्टरबाबत टेलिकॉम कंपन्यांना आदेश जारी केले आहेत. टेलिकॉम कंपनी 1 मे पासून फोन कॉल्स आणि एसएमएससाठी ऑटॉफिशियल इंटेलिजेंस सॅम फिल्टर्स लागू करीत आहेत.

## आखाती देशांत भारतीयांचे उत्पन्न कमीच अमेरिकेत उत्पन्नात ५०० टक्के वाढ

■दिल्ली, नवराष्ट्र न्यूज नेटवर्क. जागतिक विकास अहवालाच्या अभ्यासानुसार, परदेशात काम करणाऱ्या भारतीयांच्या उत्पन्नात 120 टक्के वाढ झाली आहे. यात अमेरिकेत स्थलांतरित झालेल्या कमी कुशल भारतीयांचे उत्पन्न जवळपास 500 टक्क्यांनी वाढले आहे, तर संयुक्त अरब अमिरातीतील भारतीयांचे उत्पन्न 300 टक्क्यांनी वाढले, यापुढे अंतर्गत स्थलांतराच्या तुलनेत ही 40 टक्के वाढ झाली आहे.

सिलिकॉन वॅलीमध्ये स्थलांतरित झालेल्या डॉक्टर किंवा टेक क्षेत्रातील उच्च कुशल कर्मचाऱ्यांसाठी हा नफा जास्त असल्याचा

## १८४ दशलक्ष स्थलांतरित

जगभरात सुमारे 37 दशलक्ष निवासिस्तांसह 184 दशलक्ष स्थलांतरित आहेत. स्थलांतरितांचे चार प्रकर आहेत - मजबूत कौशल्य जुळणारे आर्थिक स्थलांतरित (अमेरिकेतील भारतीय आयटी व्यावसायिक किंवा जीसीसी राष्ट्रीयधील बांधकाम कामगार), गंतव्य देशात मागणीप्रमाणे कौशल्य असलेले निवासित (तुर्कीतील सीरियन उद्योजक निवासित), संकटग्रस्त स्थलांतरित ( अमेरिकेच्या दक्षिण सीमेवर कुशल स्थलांतरित) आणि निवासित (बांगलादेशातील रोहिंग्या). भारत-अमेरिका, भारत-बांगलादेश आणि भारत-जीसीसी हे शीर्ष स्थलांतरित कॉरिडोरमध्ये मानले गेले आहेत. या अहवालात असेही नमूद करण्यात आले आहे की, येत्या काही दशकांमध्ये स्थलांतर ही एक काळाची गरज बनणार आहे.

अंदाज आहे. अगदी कमी कुशल कतार व बहीरन या गल्फ कोअॅरेशन कामगारांसाठी अनेक पटीने इथे वेतन मिळत कौन्सिल राष्ट्रांमध्ये स्थलांतरितांना कमी आहे. ओमान, कुवेत, दुबई, सौदी अरेबिया, उत्पन्न मिळते.
